

FIGURE 2. Annual Growth in Medicaid Enrollment and Spending, FY 1969–FY 2013

Notes: Spending consists of federal and state Medicaid expenditures for benefits and administration, excluding the Vaccines for Children program. Numbers exclude coverage financed by CHIP. Enrollment data for fiscal year (FY) 2011–2013 are projected. Data prior to FY 1977 have been adjusted to the current federal fiscal year basis (October 1 to September 30). Annual growth rates prior to FY 1969 (not shown here) exceed 30 percent, reflecting the program's initial startup period. The amounts in this figure may differ from those published elsewhere due to slight differences in the timing of data and the treatment of certain adjustments. Enrollment counts used to calculate growth rates are full-year equivalents and, for fiscal years prior to FY 1990, have been estimated from counts of persons served. (See Section 5 of MACStats for a discussion of how enrollees are counted.)
